

ARCleaner

Concrete and Mortar Remover

Product Description

ARCleaner is a liquid containing blended acids, for removing concrete and mortars by chemical reaction to the lime of the cement.

Typical Properties

Appearance: Yellowish Clear Liquid.

Specific Gravity: 1.155 at 20°C.

pH Value: Highly Acidic.

Uses

- Ceramic wall and floor tiles.
- Cleaning of metal forms.
- Ready mix vehicles.
- Batching plant various site tools.
- Elimination of surface latent prior to coating applications.

Application

Surface Preparation:

IMPORTANT: Never wet surface before applying this product. Completely saturate area of hardened concrete to be removed with undiluted ARCleaner.

ARCleaner can be applied by brush or spray.

A waiting time of 3 to 5 minutes to allow chemical reaction to take place Visual reaction is noted by a foaming action against the mortar.

Mortars or latents are then removed by a metal spatula while Large thicknesses of concrete are first removed by mechanicals means.

Packaging

ARCleaner is supplied in 20 non-returnable plastic jenkins, Alternatively, 1,000 liter IBCs bulk deliveries can be arranged.

Storage

ARCleaner should be stored in original containers or suitable closed tanks preferably away from extremes of temperature. The product should be kept in shaded storage at all times.

Storage Life: 12 months from date of manufacture

Health and Safety
