

ARK Release SB

Solvent Based Mould Release Agent

Product Description

ARK Release SB is a chemical release agent, specially formulated to give easy release of formwork and high quality surface finishes to concrete.

Typical Properties

Appearance: Clear Liquid

Specific Gravity: 0.85 at 20 °C

Flash Point: 75°C

Freezing Point: Less than -5 °C

Uses

- It is suitable for use on all types of formwork.
- It is a sediment free, highly mobile liquid, which can be used in very fine sprays without clogging the jets.
- Very economic coverage rates can be obtained without difficulty.
- It retains its mobility at low temperatures.
- It may be applied immediately prior to casting, or treated forms may be left until apparently dry.
- Widespread experience shows that treated forms can be exposed to give usual results.
- Continued use give progressively better results on timber formwork.

Application

ARK Release SB is ready to use and should not be diluted. It should be applied as thinly and evenly as possible.

It can be applied to all types of formwork by spray, fine-hair brush, swab or roller. Any excess should be mopped up. For the best and most economical performance, application by fine fog spray is recommended. It will not clog fine jets even at freezing temperatures.

Packaging

ARK Release SB is supplied in 20 non-returnable plastic jenkins or 210 liter free, nonreturnable containers, Alternatively, 1,000 liter IBCs deliveries can be arranged.

Storage

ARK Release SB should be stored in original containers or suitable closed tanks preferably away from extremes of temperature. The product should be kept in shaded storage at all times.

Storage Life: 12 months from date of manufacture

Health and Safety
